ABSTRACT

In 1999, the Florida Comprehensive Assessment Test (FCAT) was administered to students in grades 4, 5, 8, and 10 to assess student achievement of the Sunshine State Standards in reading and mathematics as mandated by the Florida legislature. This report informs administrators, legislators, and the general public about the reading and mathematics assessment results. This report presents the results for the 150,526 fifth graders taking a standard curriculum who took the CAT. In grade 5, the FCAT is given only in mathematics. The percentages of students scoring at each of five achievement levels are reported for schools, districts, and the state in table form. A booklet summarizing information about the FCAT and presenting sample questions is appended. (Contains three sets of tables.) (SLD)

The Florida Comprehensive Assessment Test

Introduction

In 1999, the Florida Comprehensive Assessment Test (FCAT) was administered to students in Grades 4, 5, 8, and 10 as mandated by the Florida Legislature through Section 229.57, Florida Statutes. The FCAT assessed students' achievement of the *Sunshine State Standards* in reading and mathematics.

FCAT reading and mathematics tests were developed by the Assessment and Evaluation Services Section of the Florida Department of Education with the extensive involvement of classroom teachers, curriculum specialists, administrators, and citizens from throughout Florida. The Assessment and Evaluation Services Section administers FCAT annually and is responsible for reporting information about student proficiency to students, parents, educators, legislators, and citizens. Students and their parents or guardians receive individual student reports; teachers and administrators receive school and district reports.

The purpose of the *State, District, and School Report of Results, 1999 FCAT Administration, Grade 5*, is to inform district- and state-level administrators, legislators, and the general public about the reading and mathematics assessment results.

Sunshine State Standards

In May 1996, the State Board of Education adopted the *Sunshine State Standards*—a comprehensive listing of what students should know and be able to do at various stages of educational development. These standards include more challenging content for students to learn than previous state standards and set clear expectations for student knowledge and skills. FCAT provides a common basis for measuring Florida student achievement of the high expectations set by the *Sunshine State Standards* in mathematics and reading. Though FCAT does not directly assess student achievement in the other five subject areas of the *Sunshine State Standards* (science, social studies, the arts, health/physical education, and foreign languages), FCAT test questions and reading passages use information and topics from these other subject areas.

Population Tested

The FCAT was administered to fourth grade (reading only), fifth grade (mathematics only), eighth grade, and tenth grade students enrolled in Florida's 67 school districts and the four university laboratory schools. This report presents the results for the 150,526 fifth grade standard curriculum students who participated in the assessment.

The results for certain exceptional education students (ESE) and limited English proficient (LEP) students are reported separately.

FCAT Questions

FCAT test questions are designed to measure specific *Sunshine State Standards* benchmarks for reading and mathematics. Four types of test questions are used in FCAT: multiple-choice, gridded-response (mathematics only), short-response, and extended-response.

Multiple-choice questions present direct questions or statements to be completed and four answer choices. These questions are worth one point each. Students are expected to spend approximately one minute to answer each multiple-choice item.

Gridded-response questions are used only on the mathematics tests and require students to fill in bubbled grids to indicate their numeric solutions to mathematics problems. These questions are worth one point each. Students are expected to spend approximately one-and-a-half minutes to answer each gridded-response item.

Short-response questions require students to provide answers in words, diagrams, or numeric solutions. These questions are worth 2 points each. Partially correct answers are worth 1 point. Students are expected to take about 5 minutes to respond to each short-response item.

Extended-response questions require students to draw pictures, make tables or lists, create graphs, explain solutions to problems, or answer questions about informative and literary texts. These questions are worth 4 points each. Partially correct answers are worth 1, 2, or 3 points. Students are expected to take about 10–15 minutes to complete each extended-response item.

Reports of Scores

FCAT test scores are of two types:

FCAT Total Scores. For FCAT mathematics and reading tests at each grade level, the 1999 student results are reported on similar total score scales. The lowest possible score is 100; the highest possible score is 500. The total score represents

achievement on an entire reading test or mathematics test. Eighth and tenth grade students, who take both reading and mathematics tests, receive separate total scores for each test.

Although the highest and lowest scale scores are the same, the total scores from the two different tests cannot be directly compared. A total score of 350 on a mathematics test does not represent the same level of achievement as a total score of 350 on a reading test; the subject area test scores must be considered independently.

Mean total scores are reported for districts and the state.

FCAT Subscores. In addition to the total scores, subscores are reported for each reading and mathematics test. Subscores indicate a student's achievement on the five mathematics strands (Number Sense, Concepts, and Operations; Measurement; Geometry and Spatial Sense; Algebraic Thinking; and Data Analysis and Probability) and the two reading reporting categories (Constructs Meaning from Informational Text and Constructs Meaning from Literature). Each subscore represents the percentage of content in that area that the student responded to correctly.

Mean subscores are reported for districts and the state.

Reports of Achievement Levels

Following the 1998 FCAT administration, groups of educators, business leaders, and citizens met to identify student achievement levels that were subsequently approved by the State Board of Education in November 1998. Achievement levels were defined separately for FCAT reading and mathematics tests.

These achievement levels form the basis for reporting student results from the 1999 FCAT administration. Achievement levels range from Level 1 (lowest) to Level 5 (highest) and are based upon a student's total FCAT reading or mathematics score. The FCAT achievement levels are described below.

Achievement Levels

Level 5: Performance at this level indicates that the student has success with the most challenging content of the *Sunshine State Standards*. A Level 5 student answers most of the test questions correctly, including the most challenging questions.

Level 4: Performance at this level indicates that the student has success with the challenging content of the *Sunshine State Standards*. A Level 4 student answers most of the test questions correctly, but may have only some success with questions that reflect the most challenging content.

Level 3: Performance at this level indicates that the student has partial success with the challenging content of the *Sunshine State Standards*, but performance is inconsistent. A Level 3 student answers many of the questions correctly, but is generally less successful with questions that are most challenging.

Level 2: Performance at this level indicates that the student has limited success with the challenging content of the *Sunshine State Standards*.

Level 1: Performance at this level indicates that the student has little success with the challenging content of the *Sunshine State Standards*.

The percents of students scoring at each achievement level are reported for schools, districts, and the state.

* No data are reported when fewer than six students in a category were tested.

BROWARD

The logo for the FCAT (Florida Comprehensive Assessment Test) is located in the top right corner. It features the text "FCAT" in large, bold, black letters, with "Florida Comprehensive Assessment Test" written in smaller text below it. To the left of the text is a circular emblem containing a stylized sun or starburst pattern.

LEON

The logo for the FCAT (Florida Comprehensive Assessment Test) is located in the top right corner. It features the text "FCAT" in large, bold, serif capital letters. Below it, the words "Florida Comprehensive Assessment Test" are written in a smaller, sans-serif font, arranged in three lines. To the left of the text is a circular emblem containing a stylized sun or starburst pattern. To the right of the text is a silhouette of the state of Florida.

The logo for the FCAT (Florida Comprehensive Assessment Test) is located in the top right corner. It features the text "FCAT" in large, bold, black letters, with "Florida Comprehensive Assessment Test" written in smaller text below it. To the left of the text is a circular emblem containing a sun rising over a landscape with a palm tree and water.

FCAT

Comprehensive
Assessment
Test

Keys to

FCAT

Information About the Test

This book is provided to help students learn more about FCAT so they will be better prepared for the test when it is given.

Before the end of the school year, students will receive these FCAT scores:

Mathematics Total Score and Subscores for

- Number Sense, Concepts, and Operations
- Measurement
- Geometry and Spatial Sense
- Algebraic Thinking
- Data Analysis and Probability

The highest possible Total Score is 500 and the lowest possible score is 100. Subscores represent the percentage of content that a student responded to successfully in each content area.

About FCAT

Questions and answers about the test

What is the Florida Comprehensive Assessment Test?

The Florida Comprehensive Assessment Test (FCAT) is a test designed to measure benchmarks in the Florida *Sunshine State Standards*.

Who takes FCAT?

Students take FCAT reading tests in Grade 4, mathematics tests in Grade 5, and both reading and mathematics tests in Grades 8 and 10. Only a few categories of special students will be exempt; all other students must take FCAT.

Is FCAT a difficult test?

FCAT contains questions that are challenging for all students.

Why do students take FCAT?

Recently, what students in Florida are expected to learn and be able to do has increased a great deal. The job market of today requires people who are proficient in advanced mathematics and who can read and construct meaning from difficult and technical texts. FCAT is being given to measure achievement of the high-level *Sunshine State Standards* that are being taught to and learned by Florida students.

What kinds of questions will be on FCAT?

Many of the test questions on FCAT are like those you may have answered on other classroom or standardized tests. FCAT also includes questions called “performance tasks.” This book provides examples of the types of questions that will be on FCAT.

What are performance tasks?

Performance tasks require thinking about a question and writing the answer. Some of these tasks ask for short responses like an equation for a problem or a description of how a character in a story changes. Other tasks require longer, more detailed responses such as constructing a graph or writing a comparison of two passages. Performance tasks are called “Read, Think, and Explain” questions in reading and “Think, Solve, and Explain” questions in mathematics.

How many questions will be on FCAT?

For FCAT mathematics tests, there will be a combination of about 45 multiple-choice and gridded-response questions and 10 performance tasks.

Who scores FCAT?

Multiple-choice and gridded-response answers will be scored electronically. Each answer to a *performance task* will be scored by two people trained as professional evaluators. The final score for an answer will be a combination of both evaluators’ scores.

How can students prepare for FCAT?

This book describes the types of questions used on FCAT. Separate sample test books include practice questions.

May students use calculators for the mathematics test?

Students at Grade 5 may not use calculators. At Grades 8 and 10, students may use only the calculators provided by FCAT.

Will student scores be reported?

Student scores will be distributed before the end of the school year. Scores also will be reported for each school, school district, and the state.

What are FCAT questions like?

FCAT questions use topics from subject areas such as social studies, science, health/physical education, the arts, and the workplace, as well as from reading and mathematics.

Graphic displays and illustrations are used a lot in FCAT. Graphics give necessary information and also provide pictures related to the questions. The use of graphics helps create interesting pages and also helps students grasp information better by giving them visual clues.

The ability to use thinking and problem-solving skills is important for success in today’s world. Therefore, FCAT questions and performance tasks incorporate thinking and problem-solving skills that match the complexity of the standards being assessed.

Clues for Taking FCAT

Hints for performing well on FCAT

= A clue

This key symbol appears throughout this book.

It is placed next to clues that will help you do well on FCAT.

Learn how to answer each kind of question. Each FCAT mathematics test has four types of questions: multiple-choice, gridded-response, short-answer, and long-answer.

Plan to take about 5 minutes for each short-answer question and 10–15 minutes for each long-answer question.

Read each question carefully and think about the answer before writing a response.

Answer questions you are sure about first. If a question seems too hard, skip it and go back to that question later.

There is no penalty for guessing or for wrong answers. Therefore, it is best to try to answer all questions, even if you are not sure of the correct answer.

Think positively. Some questions may seem hard, but you may be able to figure out how to answer if you read the questions carefully.

Be sure to fill in the answer bubbles correctly. Do not make any stray marks around the answer spaces.

Relax. Some people get nervous when taking a test. It's natural. Just do your best.

FCAT Mathematics Tests

Types of Mathematics Questions

Multiple-choice

FCAT multiple-choice questions always have four answer choices. Students should choose the best answer. A correct answer for a multiple-choice question is worth 1 point.

Gridded-response

FCAT gridded-response questions require you to fill in an answer on a grid. Answers may be gridded using several correct formats. You **MUST** fill in the bubbles accurately to receive credit for your answer. A correct answer to each of these questions is worth 1 point.

The FCAT “Think, Solve, and Explain” questions include “short-answer” and “long-answer” questions. For these types of questions (also called “performance tasks”), students must think about and analyze the problem presented, determine a way to solve the problem, and write an answer to the problem in their own words.

Short-answer

This symbol appears next to questions that require short written answers. Use about 5 minutes to answer these questions. A complete and correct answer to each of these questions is worth 2 points. A partial answer is worth 1 point.

Long-answer

This symbol appears next to questions that require longer written answers. Use about 10-15 minutes to answer these questions. A complete and correct answer to each of these questions is worth 4 points. A partial answer is worth 1, 2, or 3 points.

4

Multiple-Choice Questions

Read the question carefully. Then solve the problem.

If you solve the problem and your answer is not one of the choices given, re-read the question to be sure you understand what is being asked. Then check your work.

You are not required to show your work for multiple-choice and gridded-response questions. For these problems you may use the white space in the test book to do your calculations.

Once you have chosen the most reasonable answer, fill in the bubble that corresponds to your choice.

Sample Multiple-Choice Question

- 1 Which operations can be used in the boxes below to get the smallest result possible?

1 5 1

- A. + and –
- B. + and +
- * C. × and –
- D. × and +

**Correct Answer*

Gridded-Response Questions

The gridded-response questions are used only on mathematics tests. This type of question requires you to solve a mathematics problem and then fill in your answer on a response grid. The grids may be completed in several ways. Directions on how to fill in the grids are given below.

Parts of a Response Grid

For Grade 5, response grids have the parts shown below.

Directions

1. Work the problem and find an answer.
2. Write your answer in the answer boxes of the grid.
 - Print your answer with the first digit in the left answer box, or with the last digit in the right answer box.
3. Fill in the bubbles under each box in which you wrote your answer.
 - Fill in one and ONLY one bubble below each answer box in which you have written.
 - Fill in each bubble by making a solid black mark that completely fills the circle.
 - To receive credit for your answer, the bubbles in the grid MUST be accurately filled in.

Whole-Number Grid

0	0	0	0	
1	1	1	1	
2	2	2	2	
3	3	3	3	
4	4	4	4	
5	5	5	5	
6	6	6	6	
7	7	7	7	
8	8	8	8	
9	9	9	9	

answer boxes

number bubbles

Decimal and Money Grid

		.		
0	0		0	0
1	1		1	1
2	2		2	2
3	3		3	3
4	4		4	4
5	5		5	5
6	6		6	6
7	7		7	7
8	8		8	8
9	9		9	9

Percent Grid

				%
0	0	0	0	
1	1	1	1	
2	2	2	2	
3	3	3	3	
4	4	4	4	
5	5	5	5	
6	6	6	6	
7	7	7	7	
8	8	8	8	
9	9	9	9	

More detailed instructions for completing the response grids are found in the FCAT Mathematics Sample Test Books.

Sample Gridded-Response Question

2

The Eiffel Tower in Paris, France, stands 328 yards tall.
The Great Pyramid at Giza in Egypt stands 480 feet tall.
How many yards taller is the Eiffel Tower?

1 yard = 3 feet

Check to be sure you have filled in the answer boxes and matching bubbles correctly.

Sample Correct Answers

1	6	8	
0	0	0	0
1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6
7	7	7	7
8	8	8	8
9	9	9	9

OR

1	6	8	
0	0	0	0
1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6
7	7	7	7
8	8	8	8
9	9	9	9

If your answer will not fit in the response grid, remember that you might need to round your answer or use another form of the answer.

Check your work. The correct answer to a gridded-response question will always fit the response grid for that question.

BEST COPY AVAILABLE

Think, Solve, and Explain Questions

Think:

Read the question carefully. Think about and analyze what you are being asked to do. Make sure you understand what you are supposed to do before you begin answering the question.

Solve:

Begin solving the problem using the strategy you know best. Be sure to use all the information provided to determine which factors are relevant to the problem and which are not.

Explain:

Follow the directions in the test book for solving the problem and writing the solution or its explanation. Take enough time to answer the question completely. Be sure to answer each part of the question and to provide all the information requested. Use as much of the recommended time as you need.

Remember, some students will use less than 5 or 10 minutes to answer these types of questions, and some students will use a little more time. This is okay, as long as you provide a complete and correct response.

Sample Short-Answer Question

3

Look at the inequality below.

$$n < 5$$

On the number line below, draw dots to show all the whole numbers greater than 0 that n could represent to make the inequality true.

Some Think, Solve, and Explain questions will require you to show your work.

8

Sample Long-Answer Question

4

The school cafeteria has been divided into sections for a bake sale. Classes will sell baked goods in each section. Look at the Bake Sale Floor Plan below.

BAKE SALE FLOOR PLAN

□ = 1 square foot

Area of rectangle = length \times width

Find the area of Section 1 and the area of Section 2 in square feet. Show the work necessary to get the answer.

Work Space

$$10 \times 10 = 100$$

$$3 \times 17 + 3 \times 8$$

$$51 + 24 = 75$$

Area of Section 1: 100 square feet Area of Section 2: 75 square feet

In the space remaining on the Bake Sale Floor Plan, create a new section that is smaller in square feet than Section 1 and larger in square feet than Section 2.

Make an attempt to answer all performance tasks because partially correct answers can receive some points.

Be sure to answer all parts of the performance task.

365

Mathematics Content Tested

FCAT mathematics tests assess achievement of the *Sunshine State Standards* in mathematics. FCAT mathematics tests for Grades 5 and 8 include what students should know and be able to do at the end of the developmental levels for Grades 3–5 and 6–8. The Grade 10 FCAT includes content from the Grades 9–12 developmental levels. Some of the test questions and performance tasks on the Grade 10 FCAT mathematics tests address content that is currently taught in Algebra I, Algebra II, and Geometry classes. Approximately the same number of questions are used for each of the five strands in Grades 5 and 8. At Grade 10, the Geometry and Spatial Sense strand and the Algebraic Thinking strand have slightly more questions than the other three strands. FCAT mathematics tests for all grade levels assess what students know and are able to do in the following content strands:

Number Sense, Concepts, and Operations

- identifying operations (+, −, ×, ÷) and the effects of operations
- determining estimates
- knowing how numbers are represented and used

Measurement

- recognizing measurements and units of measurement
- comparing, contrasting, and converting measurements

Geometry and Spatial Sense

- describing, drawing, identifying, and analyzing two- and three-dimensional shapes
- visualizing and illustrating changes in shapes
- using coordinate geometry

Algebraic Thinking

- describing, analyzing, and generalizing patterns, relations, and functions
- writing and using expressions, equations, inequalities, graphs, and formulas

Data Analysis and Probability

- analyzing, organizing, and interpreting data
- identifying patterns and making predictions, inferences, and valid conclusions
- using probability and statistics
